

NAMRATA SARKAR

Kolkata, West Bengal, India | namratasarkar164@gmail.com | linkedin.com/in/namratasarkar9

SUMMARY

Full-stack software developer with 1.5+ years of experience building and securing large-scale, mission-critical web applications. Strong JavaScript foundations with hands-on experience in React.js, REST API integration, responsive UI development, and application performance optimization. Skilled at resolving critical security vulnerabilities and delivering audit-compliant solutions in fast-paced, collaborative Agile environments. Quick learner eager to apply strong frontend and JavaScript fundamentals to new platforms and technologies.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Python, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Laravel

UI & Performance: Responsive UI Development, Application Performance Optimization, REST API Integration

Databases: PostgreSQL, MySQL

Security & Testing: XSS Remediation, Authentication Vulnerability Assessment, File Upload Security, UI Testing, Security Audits

Tools & Platforms: Git, REST APIs, Linux, Agile/Scrum

Concepts: System Architecture Design, Performance Optimization, Scalability, Government Compliance Standards

EXPERIENCE

AeoLogic Technologies Pvt. Ltd.

Sep 2024 – Present

Software Developer | Client: National Informatics Centre (NIC), Government of West Bengal

Kolkata, India

- Developed and maintained 5+ large-scale, mission-critical government web applications using **React.js, Laravel, PostgreSQL**, serving thousands of citizens.
- Developed and deployed the **West Bengal Taxation Tribunal (WBTT) website** to production, delivering a responsive, secure, and user-friendly public-facing web application for a government tribunal.
- Implemented frontend and backend features, **REST API integration, database-driven functionality**, responsive UI, and production deployment while adhering to government requirements.
- Resolved **critical security vulnerabilities** including XSS, insecure file uploads, and authentication flaws, achieving full **security-audit compliance** and reducing application risk.
- Designed and optimized **scalable application architectures**, improving performance, reliability, maintainability, and user experience across existing government systems.
- Conducted **UI/user-level testing and security assessments**, identified defects and vulnerabilities, and collaborated with QA, backend engineers, and government stakeholders to deliver production-ready fixes.

UniConverge Technologies

Jun 2023 – Jul 2023

Python Intern

Kolkata, India

- Developed Python-based scripts and contributed to software modules, gaining hands-on experience in backend development workflows and production-level code practices.

KEY ACHIEVEMENTS

- **Security Hardening:** Led remediation of multiple critical vulnerabilities flagged in government security audits, including XSS, insecure file uploads, and broken authentication — resulting in zero critical findings post-audit.
- **Mission-Critical Delivery:** Successfully maintained and enhanced government web applications with high availability and reliability standards, directly supporting public-sector digital services for Government of West Bengal.
- **Cross-Functional Collaboration:** Partnered with government stakeholders, QA teams, and backend engineers to design compliant architectures and implement features under tight regulatory requirements.

EDUCATION

Heritage Institute of Technology

Oct 2020 – May 2024

Bachelor of Technology (B.Tech)

Kolkata, India
