SUMMARY

Full-stack software developer with 1.5+ years of experience building and securing large-scale, mission-critical web applications for government clients. Proficient in React.js, Laravel, and PostgreSQL, with a proven track record of resolving critical security vulnerabilities (XSS, authentication flaws, file upload exploits), optimizing application performance, and delivering audit-compliant solutions. Passionate about building scalable, reliable systems with clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript, Python, PHP, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Laravel, Node.js

Databases: PostgreSQL, MySQL

Security & Testing: XSS Remediation, Authentication Vulnerability Assessment, File Upload Security, UI Testing, Security Audits

Tools & Platforms: Git, REST APIs, Linux, Agile/Scrum

Concepts: System Architecture Design, Performance Optimization, Scalability, Government Compliance Standards

EXPERIENCE

AeoLogic Technologies Pvt. Ltd.

Sep 2024 – Present

Software Developer | Client: National Informatics Centre (NIC), Government of West Bengal

Kolkata, India

- Developed and maintained 5+ large-scale, mission-critical web applications for Government of West Bengal departments using **React.js, Laravel, and PostgreSQL**, serving thousands of citizens.
- Resolved **critical security audit vulnerabilities** including file upload exploits, Cross-Site Scripting (XSS) attacks, and authentication flaws, achieving full audit compliance and significantly reducing application risk.
- Designed and implemented **robust system architectures** adhering to government compliance and operational requirements, improving application reliability and scalability.
- Conducted comprehensive **user-level testing and security assessments**, proactively identifying risks and collaborating with cross-functional teams to deploy fixes, reducing audit non-compliance incidents.
- Optimized existing modules and delivered new features by emphasizing **clean code, performance tuning, and enhanced UX**, improving overall system efficiency and end-user satisfaction.
- Collaborated with cross-functional teams in an Agile environment to consistently deliver high-quality, reliable solutions on schedule.

UniConverge Technologies

Jun 2023 – Jul 2023

Python Intern

Kolkata, India

- Developed Python-based scripts and contributed to software modules, gaining hands-on experience in backend development workflows and production-level code practices.

KEY ACHIEVEMENTS

- **Security Hardening:** Led remediation of multiple critical vulnerabilities flagged in government security audits, including XSS, insecure file uploads, and broken authentication — resulting in zero critical findings post-audit.
- **Mission-Critical Delivery:** Successfully maintained and enhanced government web applications with high availability and reliability standards, directly supporting public-sector digital services for Government of West Bengal.
- **Cross-Functional Collaboration:** Partnered with government stakeholders, QA teams, and backend engineers to design compliant architectures and implement features under tight regulatory requirements.

EDUCATION

Heritage Institute of Technology

Oct 2020 – May 2024

Bachelor of Technology (B.Tech)

Kolkata, India
